

EVALUATION SUMMARY

Western Section AUA
 Sunday, October 25, 2009 - 3:30pm - 5:30pm
 Poster Session III: Kidney / Calculi

	Scale: = POOR / ADEQUATE / EXCELLENT				
	1	2	3	4	5
PROGRAM OBJECTIVES	Total Pts	# Returned	Total Ave Score		
Discuss new systemic therapies for renal cell carcinoma.	693	156	4.44		
Distinguish the various treatment options of small renal masses.	710	156	4.55		
Summarize the role of single site surgery in the management of urologic diseases.	690	156	4.42		

OVERALL EVALUATION

Increased My Awareness/Understanding of the Subject	705	156	4.52
Will Influence How I Practice	677	156	4.34
Helped Me Improve Patient Care	687	156	4.40
Was Educationally Sound and Scientifically Balanced	714	156	4.58
Avoided Commercial Bias or Influence	719	156	4.61

Points that will influence the way I will practice:

Consider LESS - curious about Habits device.
 Biodegradable stents.
 Single port approaches.
 Keeping in mind how much xRT pts. Are getting with fluoro.
 Good session.
 RFA is ok.
 Active surveillance for SRNA's.
 How to retract kidney using single port.
 Renal preservation is one key surgical goal.
 You can skip 24 hr. urine collection and use racial background.
 Use fibrin sealant for PCNL tubeless.
 Better awareness in evaluating and managing renal cell carcinoma.
 Decrease use of fluroscopy.
 Metabolic w/u different.
 MET management for ureteral calculi works well.
 Consider less invasive ---- for small renal masses.
 That I probably won't be doing single site surgery.
 LESS has greater potential as surgical option than previously felt.
 Use LESS fluroscopy.
 Tubeless Perc's.
 Minimally invasive treatments for small renal masses are becoming more effective.
 Counseling patients about LESS, where available.
 Good to see/heat about the new technology.
 Sandwich technique stop renal bleeding after PCUL.
 Look into rfablative probe.
 Patient education will be more thorough.
 Use of sutureless technique in laparoscopic partial nephrectomy.
 It was interesting to learn practice pattern for primary care physician in treating kidney stones.

Points that will influence the way I will practice: (Continued)

LESS is a challenging process to learn, I do not think I will use it. Laparoscopy is challenging enough.
 Utilization of Medical Expulsion Therapy for ureteral calculi.
 This will not influence how I approach renal masses for the time being.
 Use tamololol for medical stone explosion.
 There are more racial differences that increase the incidence of kidney stones.
 Will do cryo over RF if more appropriate.

Moderators: Dr. John Leppert & Dr. James L'Esperance			
The moderators guided and enhanced this session.	717	156	4.60

Comments about moderators:

Good questions.
 Good.
 Appropriate comments.
 Good. Late start.
 Good Q&A.
 Excellent.
 Smooth.
 Excellent.
 Excellent discussion.
 Great discussion and learning. 10-15 minute over time.
 Dr. James L'Esperance was an outstanding moderator.
 Good.
 Enjoyable.
 Knowledgeable.
 Excellent.
 Good job.
 Dr. James L'Esperance did a nice job.
 Very engaging to speakers.
 Intelligent questions of presenters ans in polling audience.
 Excellent job of fostering discussion.
 Though discussion was good it prolonged the program too much. Also moderators all day did not know till the-
 audience told them of papers that were cancelled.
 Good job. No complaints.
 Moderators asked provactive questions.
 They were mostly on time and had relevant discussion of subject material.
 Overall good.

Comments about speakers/course content:

Biodegradeable stents were great. New fee code noted.
 Unable to hear all presentors.
 Good.
 Good posters.
 Excellent.
 Great job of current controversies in endourology.
 Good.
 Well done.
 Knowledgeable.
 Hard to understand Dr. Jun Morita.

Comments about speakers/course content: (Continued)

Good review of minimally invasive treatments.

Did not stay on time.

A little long-may have been better to break into 2 sessions. Although it was great to have a break in posters- to not compete with socioeconomic course.

Many interesting ideas.

Fair to good.

Overall good.

Recommended topics for future meetings:

DVD on ureteral stone extraction.

How to keep tract of stents. A bracelet?

Same.

Healthcare costs. What should we be doing and promoting to provide basic quality healthcare to rural communities- with populations of 10-30,000 people.

Continue stone sessions.

Less on LESS.
