### Comments about speakers/course content:

Nice talks.

Very enjoyable presentation by Prof. Shillinglaw.

Excellent entertaining talk by Prof. Shillinglaw. I really enjoyed Dr. Thomas' performance.

Sarah Conley's talk was very moving!

Steinbeck presentations absolutely fantastic!!!

The intersection of science and art (literature) was interesting to me and we scientists need more of that, attempts at collation and integration of knowledge.

Drs. Ahlering and Conley were terrific and extremely informative.

Excellent review.

Excellent presentation on Steinbeck.

Excellent presentation on Steinbeck and Cannery Row.

No one had a good laser pointer all week - was no one paying attention.

Shillinglaw and Thomas were excellent.

Shillinglaw and Thomas - both were good!

Steinbeck talk excellent.

Excellent presentation.

Great Stuff.

Excellent.

All great talks.

Very interesting content. Highly recommended.

Very good.

Prof Shillinglaw talk very interesting.

Talk on Steinbeck very interesting.

The Cannery Row/Steinbeck lecture was great. My wife and I enjoyed it thoroughly and learned local history.

**Comments about speakers/course content: (CONTINUED)**

Very nice to have this lecture on a non-urology topic.

Absolutely loved the presentation - was struck by the presentation in a great way - very much appreciated - best presentation.

I didn't win the scope again!

I enjoyed it and guests enjoyed it - Great Lectures!

**Recommended topics for future meetings:**

Talk about how Las Vegas started.

Really love non-urology (even non-medical) topics.

Literary description of G.V. disease.

Further addresses.

More of same.

Keep it up. In Vegas we should have a talk on how Mormon Pioneers were instrumental in establishing and building that city - amazing history if you look into it.

Being educated about the local history is / would be nice.
